

Sky Lift Assembly Instructions Sheet 1 of 2

In order to assemble the Sky Lift wheels you should have the following parts, pictured above: 3 x Legs (each individually colour coded), 2 x Wheels with brakes, 2 x Wheels without brakes, 1 x 10mm Allen Key, 3 x M12 Bolts, 1 x M12 Bolt (Long), 4 x M12 Nuts, 4 x Washers & 1 x Gold spacer.

Firstly take one of the wheels with brakes along with the **Long M12 Bolt** & the **Gold Spacer**. This needs to be fitted to the large main upright section of the abba Sky Lift (shown in picture 3). Assemble as above with the gold spacer in between the wheel and the black section of the Sky Lift. Finally secure with the washer & locking nut and tighten securely.

Once you have completed step 2 it is important to make sure the wheel swivels freely on its bearings. If this is not the case you may have over tightened the nut in which case loosen it slightly. The bolts do not need to be excessively tight.

Please note, these are assembly instructions for installing the wheels to the Sky Lift only. Once you have installed the wheels please continue to Sheet 2 for assembling the rest of the Sky Lift. (These can be found included with the bolt kit)

Next, take the second brake wheel and fit to the Sky Lift leg marked with a **BLUE** label. Assemble the wheel as in step 2 but without a gold spacer.

Finally assemble the remaining wheels (non brake type) as before to the remaining red and yellow marked legs. Remember to make sure each wheel rotates freely, if not loosen slightly.

Quick Reference

Main Sky Lift Upright:
BRAKE WHEEL (WITH GOLD SPACER & LONG BOLT)

Blue Leg: BRAKE WHEEL

Red Leg: NON BRAKE WHEEL

Yellow Leg: NON BRAKE WHEEL

To help you assemble the abba Sky Lift we have made a video guide. We would highly recommend you watch this video. Please scan the QR code above with your smart phone, visit our website or the abba stands youtube page: www.youtube.com/abbastands
